

# Fork-lift trucks: LPG from Flogas – the clear choice

people with energy

# The leading fuel for fork-lift trucks

Whether you're looking to make the switch from an alternative fuel source, or are already enjoying its benefits, find out how an LPG supply from Flogas could benefit your business.

LPG is already the fork-lift truck fuel of choice for many of the leading companies in the material handling industry and it's easy to see why:

## LPG – an exceptional energy

An LPG powered truck will give you unparalleled reliability, whether required for indoor or outdoor use. When compared to the alternatives, no other fuel offers so many advantages with so few of the drawbacks:

	 <b>LPG</b>	 <b>Electric</b>	 <b>Diesel</b>
<b>Lowest carbon footprint</b>	✓		
<b>Quiet</b>	✓	✓	
<b>All terrain</b>	✓		✓
<b>Indoor and outdoor</b>	✓		
<b>Minimal downtime</b>	✓		✓
<b>Cheapest truck to buy new</b>	✓		
<b>Low maintenance costs</b>	✓		✓
<b>Clean burning fuel</b>	✓	✓	
<b>Lead and soot free</b>	✓	✓	
<b>Flexible storage solution</b>	✓		
<b>Optimises valuable space</b>	✓		

## Is LPG suitable for your business?

Simply put, yes. Whatever your requirement, indoors, outdoors, warehousing, haulage, industrial, automotive or the food industry, LPG is perfect for all uses. How many other fuels can say that?

# Why choose Flogas? – the clear choice

We may be biased, but when it comes to choosing an LPG supplier, we think Flogas take some beating.

**Turn key solution** – We know that every business is different and that's why we tailor our service to fit your individual needs. Together we will design the perfect solution: whether it's choosing the right supply option or installation method, finding a pricing structure that suits you or an after care package that's just right, we are not just a fuel supplier, we're your business partner for energy.

**High level of quality service** - You're striving to be the best and so are we. All our staff, from our account managers, to expert engineering team and dedicated delivery drivers are expertly trained to deal with any situation.

**Competitive prices** – We understand that to create a long lasting relationship, the numbers have to add up. We will work with you to create a pricing structure that makes sense for your business.

**Safety first** - Safety is at the heart of everything we do. We will carry out regular safety and maintenance inspections at your site, so you have peace of mind.

If you do ever have concerns, we have a 24 hour emergency team, who are always on hand to help.

**Full training** – It can sometimes be daunting for your staff to start using a different fuel source, but we provide full training for your personnel, to ensure they're comfortable and confident in what they need to do.

**Up to the minute technology** – We are always looking for new ways to improve our products and services. For example each LPG cylinder now comes with magnet technology, ensuring that fragmented metal particles within the cylinder don't cause any blockages, keeping you running at all times.

**Environmental credentials** – Like our fuel, we strive to be as environmentally friendly as possible. Protection of the environment forms part of our values and principles. We also consider it sound business practice. Flogas are proud holders of the Carbon Trust Standard.

**The power to deliver** – Flogas offer truly national coverage, with a network that boasts more filling plants than our major competitors combined:

# Flexible supply options

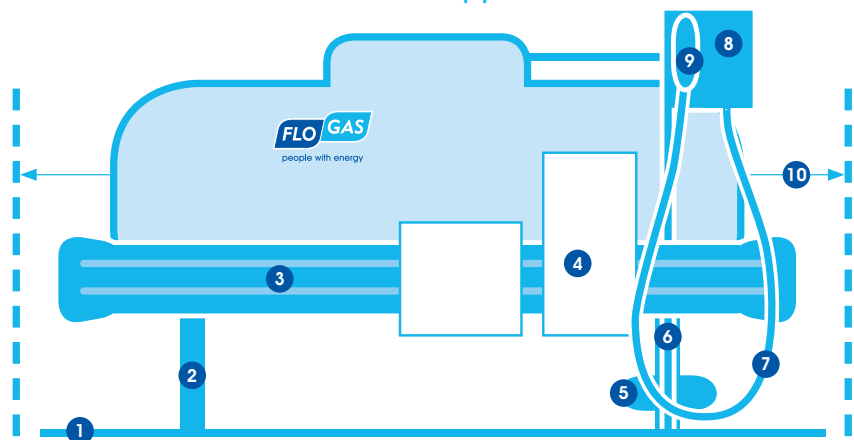

We will work closely with you to determine your business' supply requirements, based on the number of vehicles, length of shifts and space available. Whatever your size and needs, Flogas have the supply option to suit you:

- 1 Concrete or good hard standing (NOT Tarmac)
- 2 Skid frame
- 3 Armco crash barrier
- 4 Signs & Instructions
- 5 Motor & Pump
- 6 Break away coupling
- 7 3m Hose
- 8 Enclosed control box
- 9 Dispensing gun
- 10 Distance to boundaries, buildings or fixed sources of ignition on ALL sides as per LPGa CoP 1 Part 1 Table 1

Tank size  
 1 Tonne Tank - 3m x 2m  
 2 Tonne Tank - 4m x 2.2m

## The Modular Approach

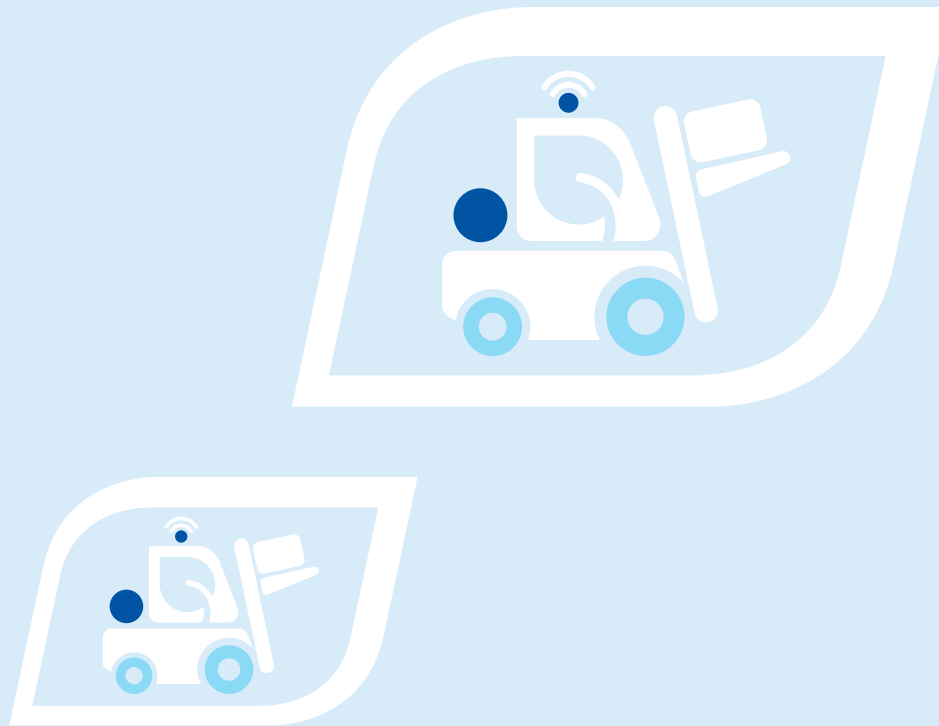

If you're running a sizeable operation the easiest, most cost effective, option is a bulk supply.

We can install a bulk storage tank on your premises and train staff on its use. Our top-up service will then take the hassle out of ordering as we calculate how much gas you're using and schedule deliveries accordingly.

Of course if you don't have the space or need for a bulk storage tank, we can supply cylinders.

An 18kg FLT cylinder can be changed in a matter of minutes, keeping downtime to a minimum. We also have smaller cylinders which can be handled with ease.

## The complete package.

At Flogas, we truly believe that we have the complete package for fork-lift truck users. Not only do we have a fuel that can save your business cost and reduce your carbon footprint, but we have a service level that is second to none. With a truly national delivery network, a dedicated workforce and competitive pricing, we boast some of the largest multinational companies as our clients. For them and for many others LPG from Flogas is the clear choice.
