

Holiday and Home Parks – make the break with Flogas

people with energy

Take a break from worrying about your energy supply; Flogas make it easy

The Perfect
Alternative

Flexible
Approach

National
Delivery

Friendly
Staff

As a holiday or home park owner, you'll no doubt already know all the benefits that a Liquefied Petroleum Gas (LPG) supply can bring to your business:

- The perfect alternative to mains gas
- Real gas flame cooking
- An affordable fuel
- Flexible supply
- Environmentally friendly

What you might not know is that, as the second biggest player in the UK's LPG industry, Flogas are ideally placed to offer you all the benefits of being with a big company; truly national distribution network, confidence in supply and security, whilst maintaining the caring, down to earth manner you might expect from a smaller business.

Flogas people are different

We talk in a more caring, down to earth manner, developing lasting relationships with our customers.

We're a people business, not a giant faceless corporation. Yet we are not small – anything but. Flogas is the second biggest name in LPG in the UK.

We don't shout about our achievements; we're more concerned about what we can do for our customers. Our staff are always there to help, proving as reliable as the LPG fuel itself.

To help you make the switch to LPG, ask us to come up with a turnkey solution based around your needs. We're not rigid in our thinking, so we'll develop a flexible approach that suits you.

What do Flogas know about the caravan, holiday and home park industry?

Plenty. Flogas are members of the BH&HPA and NCC and have been working alongside some of the biggest names in the industry for over 25 years. Over this time we've learnt the need for flexibility when it comes to our approach and think we're in a unique position to offer an innovative approach, responding to changes in the market, whilst adding value to your park offering.

Still not convinced? Take a look at what else Flogas can offer and then give us a call to make the switch.

Breaking the mould – innovative technical solutions

Free Site
Survey

Detailed
Plans

Expert
Technical Team

Flexible
Supply Options

We know every park is different, which is why as part of the service we'll survey each of your sites free of charge to work out what is needed. As your business has expanded over the years, you may find that you no longer have the most efficient energy solution to match your changing requirements. Flogas will take care of this, with our expert technical team assessing your needs, working with you to devise a project plan that provides the perfect installation. You'll be provided with detailed technical drawings and explanations as to why we believe our plans will improve your business and save you money!

If you do decide to switch to Flogas, then our own engineering team will deal with all the necessary work quickly and efficiently. And don't worry, we know you can't have any major disruptions to your park, we'll work to your timescales, completing all work during your short window of closure.

Supply options

Each park will have individual requirements when it comes to energy supply and storage and that's why we offer a range of different approaches. The beauty of the Flogas approach is that we won't force one solution on you, we'll work with you to decide whether it's more effective for you to run your park on cylinders, bulk supply or a combination of both.

Cylinders

Our 47kg and 19kg propane cylinders offer an ideal solution for the heating and cooking requirements of your residents and guests. They are particularly popular where space is a premium and larger bulk installations are not possible.

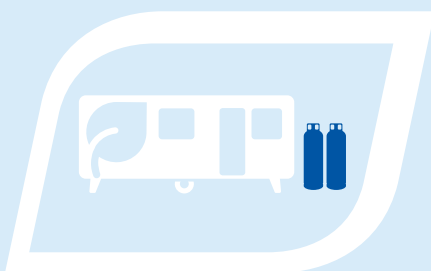

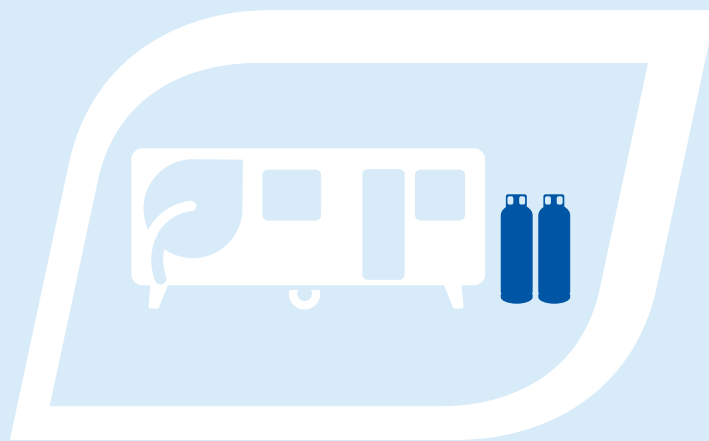

Cylinders will commonly be fitted in pairs, with changeover kits available to ensure continuity of supply. Cylinder shelters can also be provided to help with aesthetics of your park.

Bulk

If space is less of a concern or your volume higher, then Flogas can provide LPG in bulk tanks. The necessary infrastructure can be installed quickly and easily and can be tailored to suit your park's needs. Whether you require tanks above or below ground, Flogas' expert in-house technical team can assess your needs and provide the best solution. As a busy park, we know you won't have much time for worrying about your gas supply and that is why we can offer a reliable top up scheme, where we will estimate your usage and schedule deliveries without you ever having to place an order.

Metered estate

We are able to offer a metered supply where gas will be piped to individual homes from a central tank(s). We can install this option for you whether it exists currently or is a new approach to energy supply. A free site survey would allow us to provide detailed options to meet your requirements.

Make the break with your current supplier and join Flogas

Competitive Pricing

Friendly Customer Service

Innovative Technical Solutions

The Clear Choice

Competitive pricing

As one of the UK's leading suppliers of LPG, you would expect us to offer competitive prices and you won't be disappointed.

Price fixing

Often certainty of pricing is the main objective of pricing strategies. We are able to offer fixed pricing periods where we will hedge your product requirements in advance.

Package pricing

We aim to be flexible and responsive in our pricing strategy, so that you get the right deal for your circumstances. If for example you would like to upgrade your site with cylinder covers but would prefer to avoid the one off cost of purchasing them, then we can build this cost into our pricing discussions. This approach we believe is unique in the industry and makes us the ideal energy partner. Please contact us with details of your specific requirements and priorities and we will build a pricing structure to suit your needs.

Incentives and further discounts may be available for increasing your volume or recommending other parks to Flogas.

Why make the break and choose Flogas.....?

- Competitive and flexible pricing and payment structures
- Quick & reliable delivery
- Hidden storage options for both cylinder & bulk supply
- National network of depots offering a local supply
- Friendly customer service
- Personal account manager
- Free site survey
- Innovative and original solutions
- Tailored technical support (e.g. underground pipe testing to certification)
- Safety and technical guidance
- 24-hour emergency phone line
- Environmental credentials
